

THE EMPRESS EXPRESS

VOLUME XVII. No. 7

EMPRESS, ALTA. THURSDAY, Aug. 1, 1929

Price: \$2.00 Per Year.

United Church

The Church School, 10.30 a.m. Public Worship, 11.30 a.m. Service will be conducted by Mr. J. A. Houston B. A., of Acadia Valley. The services at the country appointments will be withdrawn until the return of your pastor on August 11. We invite you all to worship with us.

Rev. Geo. A. Shields, Minister.

Citizens were awakened in the early hours of Friday by a woman's shrieks and cries for help. It appeared that a woman and man travelling to Oyen by car and more or less under the influence of liquor were quarrelling. The woman is reported as crying that her companion was trying to kill her. The man was lodged in jail for the night. In the morning, after paying court costs, they resumed their journey, apparently once again on peaceful terms.

A new hospital district, to be known as the Cabri Union Hospital District, has been authorized. It will embrace the town of Cabri, the village of Schenckleton and portions of the rural municipalities of Riverside, Pittville and Miry Creek. The hospital will be located at Cabri and will be operated under a board of six members.

Progress Of Buildings Being Erected Here

The foundation for the Catholic Church is progressing, and work on the church structure will soon be commenced.

The C.P.R. roadmaster's residence, opposite the station, which is in course of construction is well under way. The foundation is completed and carpenters are now at work on the framework of the house.

Good progress is being made on the construction of the Wheat Pool elevator.

The work of re-siding the hotel building commenced this morning.

"The Garden of Eden"

Corinne Griffith makes her United Artists debut in "The Garden of Eden," a comedy romance film based on the stage play of the same name, her picture coming to the Empress Theatre, this week.

Apples, serpents, fig leaves and Paradise are not present in this "Garden of Eden," for it is a modern clothes version of the oldest story in the world. It is at the Hotel Eden, outside Monte Carlo, that many humorous and romantic adventures befall Toni LeBrun, French shop-girl off on a lark with her friend, the Baroness Rana de Givrier. The startling climax to these adventures is a wedding which ends in a riot.

"The Garden of Eden" was made at the United Artists studio in Hollywood, William Cameron Menzies designing the sets.

More than 11,500,000 trees were distributed in Ontario last year. Twenty-six steel lookout towers and 400 miles of telephone lines were erected in the province by the forest protection service, which now has 60 steel lookout towers and 137 wooden ones. The latter will be replaced with steel ultimate by.

Wheat Pool Payment

Calgary, July 31.—A second interim payment on wheat delivered during the past crop year has been announced by the Alberta Wheat Pool. The basis of this payment is:

1 Northern, 17½¢; 2 Northern, 14¢; 3 Northern, 13½¢; 3 Wheat, 18½¢; 5 Wheat, 12¢; 6 Wheat, 14¢; Feed Wheat, 3½¢; Tough 1 Northern, 23¢; Tough 2 Northern, 20½¢; Tough 3 Nor. 18½¢; Tough No. 4 22½¢; Tough No. 8, 16½¢; Tough No. 6, 7½¢; Tough Feed 10½¢.

Beside the above, payments were made on something like eighty other grades ranging as high as 40¢ on 3 Tough Sooty wheat, to as low as 3¢ on broken wheat.

The total amount of the payment made by the Alberta Pool was over eight million dollars. There will be another payment during the coming fall.

Deductions for elevator and commercial reserves and for operating expenses, totalling \$4 a bushel, have been made from the payment to members.

The amount is more than will be required but the exact figures will not be available for some time yet, at the end of the Pool's business year. When the final figures are available the excess will be refunded to members along the final payment.

Forty Motor Shows Held In Canada This Year

More than 40 Canadian cities and towns have held motor shows so far during 1929, thus exceeding the attendance of their inhabitants on the automobile. In an interview The Mail and Empire this point was advanced by H. Brown, vice-president of General Motors of Canada, as an indication of the tremendous interest manifested by the public in new models and new makes of cars, which were viewed for the first time at the various shows.

Government

The great duty of government, in public and other works, says Henry Ford, is to make the way easy for the public to gain benefits. It is not equipped to make prosperity, but it is equipped to make prosperity possible—just as it is equipped to make prosperity impossible.

C. R. Moore returned from his vacation on Friday.

Wedding

The marriage of Mr. Lewis Grudecki and Victoria Spars was solemnized at Cleveland Catholic Church, Wednesday July 31. Nuptial mass was celebrated at 9.30 a.m. The ceremony was performed by the Rev. Father Leo Sullivan, and a large number of friends and relatives were present at the ceremony. Mr. Louis Niva was best man, and Miss Gertrude Crossell, maid of honor. The happy couple will make their home on the groom's farm, and they have with them the good wishes of everyone during the continuance of their married life.

Temperatures Climb

Temperatures of the past week have been excessive. Monday registered 104 degrees and Wednesday 105 degrees on the official thermometer. However, it is fairly safe to assume that the temperatures where the farm lands start in are a good 4 degrees lower in temperature than at the depot where readings are taken. The depot is the lowest spot in town.

British Columbia's Tallest Spar For Toronto Exhibition

Carrying on her deck, what is said to be the tallest spar of Douglas fir, shipped out of British Columbia, the Canadian National Steamship, The Canadian Ranger, reached Vancouver, recently via Panama. This spar is 180 feet in length, measures 35 inches at the butt and is ten inches at the top. It weighs 5,000 pounds and contains 5,000 feet board measure. It was cut by the Timberland Lumber Company and forwarded as a gift to the Canadian National Exhibition at Toronto.

Temperature records were shattered in Western Canada on Friday last, when Estevan registered 106 degrees in the shade and Yellow Grass, 105 degrees. Five points recorded 100 degrees and over and twenty-seven points over the ninety degree mark. Empress recorded 97 degrees.

For Sale

Two, used, Massey Harris tractors. It will pay you to see these machines.—See or phone H. Tucker, Bindles, Alta.

Prairie Fire At Hanna Sweeps Large Area

A large prairie fire in the Hanna-Coronation district on Saturday of last week burnt over thousands of acres of land. Two farmsteads were destroyed. The fire was ten miles wide by forty miles long. The blaze started from an old straw bottom. As a result of the conflagration it is announced J. S. Whitman who is considered responsible will be prosecuted for the damage and severe injuries from burns of one of the fire fighters.

R. M. Henderson, of Assiniboia, was a visitor in town over Saturday.

Losses Car By Fire

Walter Northcott had the misfortune to have his Essex coupe destroyed by fire when travelling to the old West ferry site on Wednesday. The origin of the fire is not known.

Injured in Auto Accident

The parents of the driver were thrown from the back seat of a Chevrolet touring car when their car left the road and went into a shallow ditch near to the Horn farm on Wednesday. Dr. McNeill was summoned from town to attend to the injured members of the party and they were brought into the hospital.

To A Horse

O horse, you are a wonderful thing,
No horns to hook, no bells to ring,
No license buying every year,
With plates to screw on front and rear.
No spark to miss, no gears to strip.
You start yourself, no clutch to slip.
No gas bills mounting every day
To extend the joy of life a way.
Your inner tubes are all O.K. and,
Thank the Lord, they stay that way.
Your spark plugs never miss or foul;
Your motor never makes us fuss.
Your frame is good for many a mile,

Reindeer Herd To Be Taken To Eskimo Area

Ottawa, July 29.—Arrangements are now in progress, for the transportation from Alaska to the eastern delta of the Mackenzie river of a herd of 3,000 reindeer and it is expected that the drive will begin some time in October.

Several years will be required to herd the great number of animals across the northern strip of the Arctic. This is part of the Canadian government's scheme to establish the raising of reindeer as an industry in that region, not for the ambitious project of commercializing it so much as to furnish food for the wards of Canada, the Eskimo population. Alarming reports of a growing scarcity of food in the northland have been received from time to time, and it is hoped that this action on the part of the government may contribute in some measure towards allaying that alarm.

The two leading items in the total agricultural production of Canada in 1928 are: Field crops, \$1,009,781,000; and dairy products, \$260,000,000.

Your body never changes style.
Your wants are few and easily met—
You've something on the auto yet!

Solemnity Marks Thanksgiving Service At Westminster Abbey

London, England.—Westminster Abbey was the scene of a most impressive service on Sunday which will have its place in the history. The King and Queen joined with their subjects "in thanksgiving to Almighty God for His good providence whereby our most gracious Sovereign has been delivered from severe illness to the comfort of the whole Realm, and for the signal love and loyalty of His people made manifest in the time of trouble."

Probably there was never a more simple royal ceremony on a great occasion than today. Their Majesties went to the Abbey with only two attendants, and flanked by half a dozen mounted constables. Save for a few rows of gilt chairs in the Presbytery, the furnishings of the Abbey were not to be seen from those which may be seen on almost any Sunday of the year. The choir members were disposed on the screen around the organ console, so that their usual places might be available for official persons.

The King was in morning dress, with a white flower in his lapel. The Queen wore a toque hat with a dress of the palest shade of lavender. Immediately following their Majesties walked the Prince of Wales, the Duke and Duchess of York, Prince George, Princess Mary and Lord Lascelles, Princess Victoria, and other members of the Royal family.

Meanwhile the transepts and choir began to fill with persons specially invited. There was a few women in the dress either of men or women—so far as men were concerned it was a morning dress and most of the women nobly gowned, perhaps because the weatherman was not too promising. The chief exception was a little group of Indians.

The imposing procession moved slowly towards the presbytery while the choir sang verses by the late Sir Philip Elton. The King, the Queen on his left, and the Prince of Wales on his right, and the other members of the Royal family around them took their seats on the south side of the presbytery.

"That fine old hymn, 'All People That on Earth Do Dwell,' was sung to the familiar and robust tune. A pause, and then a thunderous roll of drums. They ceased, and the dean, facing down the Abbey, cried: 'God Save the King. God save this realm. God give us thankful hearts.'"

A stirring peal of trumpets followed, after which the King, seated in the congregation in the first verse of the national anthem. A series of sentences were read, chiefly from the Psalms, were recited by the dean. The archbishop then led the people, now on their knees, in the Lord's Prayer, and several of the collects.

"We thank thee that Thou hast given our King the joy and comfort of knowing that he possesses the hearts of his people, and we pray that the remembrance of him in thought and prayer made by the folk of many races and in many lands may give the promise of a time when all the peoples of the world shall share their joys and sorrows as members of one family in Thee, who art the Father of all." There were other sentences as felicitous as these.

Then the congregation joined in the general thanksgiving, some of which were doubtless familiar to even the least devoted. The Royal Family, first making their obeisance to the Holy Table, departed. Out at the west door, Their Majesties, with the Princes and other members of the Royal Family, paused for a while for a gracious exchange with such of their acquaintances as were there. Others high in the service of this and other states came out and greeted one another on the lawn surrounding the Abbey.

The service was all smiles. So, too, was His Majesty, but there was no doubt that he still bears traces of what he had been called upon to endure.

Indian Woman Kills Bear

Escapes With Few Scratches After Fifteen Minute Battle

Sault Ste. Marie, Ont.—Francis Zuckergut, an Indian woman of France, battled valiantly against a bear which attacked her as she was inspecting traps near her home. Carrying a papoose on her back the woman was greatly handicapped when the bear, which was followed by two cubs, charged at her with ferocious fury. Armed only with a small axe the woman fought for 15 minutes and finally succeeded in killing the bear, escaping herself with a few scratches. The animal was a large one. The cubs escaped into the bush.

Father Sought By Radio

Message Sent To Police Officer In Far North To Advise Him Of

Ottawa.—A sick child in a hospital here is waiting reply from his father at the lonely Royal Canadian Mounted Police post at Cheyenne, Inuit on Hudson Bay, to a message broadcast over the Canadian National Railways Radio chain. The message was to advise Staff Sergeant M. A. Joyce, that his 14-year-old son, Scott, is seriously ill here, and asking him to get in touch with Ottawa by radio if he can get to a sending station.

French Not Evacuating Rhine

Paris.—The French war ministry denied reports published in a German newspaper that the French had started evacuation of troops from the second occupied zone of the Rhine Valley. The ministry said, however, that troop movements were underway, but insisted that the movements were part of a prepared program of evacuation, and that they would replace old ones with a slight reduction in total effectives.

Increase In Tax Collections

Ottawa, Ont.—Income tax collections for the Dominion for the three months ended June this year, show a 29 per cent. increase over the corresponding period last year. The total collections for the three months ended June this year, were \$16,052,241, as compared with \$12,537,923 in the previous period.

Viscount Cecil Appointed To Represent Britain On Disarmament Commission

London, England.—Cheers from the Labor benches greeted the announcement in the House of Commons of the appointment of Viscount Cecil again to represent Great Britain at the Preparatory Disarmament Commission of the League of Nations and to attend the forthcoming assembly of the league.

The league assembly delegation also will include the following: Right Hon. Ramsay MacDonald, prime minister.

Right Hon. Arthur Henderson, secretary for foreign affairs.

Right Hon. Wm. Graham, president of the Board of Trade.

Mrs. M. A. Hamilton, Labor M.P., Blackburn.

Helen Maria Swanwick, speaker, lecturer and publicist.

Viscount Cecil, who was under-secretary of state for foreign affairs and minister of blockade in the war-

time coalition government, and later became Lord Privy Seal in the Baldwin Conservative government in 1923 and 1924, has had considerable experience at Geneva as a British spokesman. He resigned from the disarmament delegation of the British government shortly after the collapse of the tripartite naval conference at Geneva in 1927.

A protest was raised from the Conservative benches after Mr. Henderson had announced the delegation. The Conservative members said it was the first occasion when the secretary of state for foreign affairs, Viscount Cecil, the British representation was entirely made up of representatives of one party.

Mr. Henderson chimed in reply, that by Viscount Cecil's inclusion, he had fulfilled the undertaking to follow the precedent set in 1924 when the delegation was not strictly of a party basis.

State Control Of Radio

Royal Radio Commission Makes Important Recommendation

Ottawa.—Government control of all broadcasting stations, elimination of advertising from the programs and that licensees pay the expenses by licensees were advocated before the Royal Radio Commission at the final session here by the All-Canada Congress of Labor and the Canadian Legion of the British Empire Service League.

The Canadian Congress representatives also recommended that the present commission be continued or a similar organization be established vested with complete administrative control of radio broadcasting.

The Canadian Legion advocated a broadcasting organization that would develop imperial patriotism and Canadian culture. Canadians, said the Legion speakers, were being overwhelmed by foreign propaganda charged with propaganda.

The commission will at once begin the preparation of its report. It will probably be available about the end of the month.

Killed By Artillery Shells

Two Accidents Cause Death Of Five In Poland

Warsaw.—Two accidents involving heavy artillery killed five persons and injured a number of others in Poland. In one case two country boys, playing on a Russian-Austrian battle front near the village of Luck, they took it home, where it exploded, killing a family of four and wrecking the home. The other accident occurred near Cracow, where, in artillery practice, a shell landed in a group of military observers, killing one and injuring several others.

Prince Sails For Home

Prince Henry Goniwe Kathakasis, South-Africa At Quebec

Quebec, Que.—Prince Henry, Duke of Gloucester, completed his month's visit to Canada, when he sailed from this port on the "Empress of Australia" bound for England. A fast dispatch ship and the presence of the Governor-General, Lord Willingdon, and Lady Willingdon on the deck heralded the Prince's departure, while citizens of the ancient capital turned out in large numbers and gave the King's fourth son an enthusiastic send-off.

May Spend Winter In Africa

London, England.—The Evening News says it understands the King is considering proposals to spend part of next winter in the British dominions. South Africa, about which confidential inquiries already have been made, is considered the most suitable.

Favors Arms Cut

Tokyo.—Admiral Hye Akamatsu, minister of naval affairs in the new Minato cabinet, in an interview, pledged support to further limitation of naval armaments.

PARLIAMENTARY SECRETARY

Miss Susan Lawrence has been selected as parliamentary secretary to the British minister of health by Premier Ramsay MacDonald, according to the list of appointments to the junior cabinet posts.

Gold Rush Started

Report Of Strike In Northern Saskatchewan Causes Excitement

Big River, Sask.—The placer gold and platinum strike about 300 miles north of Big River, Sask., has caused considerable excitement at this point. About 100 men have left here, and over 400 from other points have gone to the scene of the new find. A number of parties are now outfitting at this point and will leave by horse and caulk this week.

The principal find is reported at Froisher Lake. An old prospector who just arrived here from the scene of the strike to secure supplies reports that when he left over 500 claims had been staked around Froisher and Birch Lakes.

The route to the new placer field is by water, the entire distance being without portages, via Big River, Isle La Crosse, Lake Deep River, Clear or Churchill Lake. All kinds of reports are coming in as to the richness of the new finds. One report stating that \$17 was washed from one shovel of dirt.

Envoy To Japan

Hon. Herbert Marler Will Deliver Canadian Message To Tokyo

Ottawa, Places at which Hon. Herbert Marler, Canadian minister designate to Japan, will speak on his trip west from Montreal on July 14, have been announced here.

On his way to British Columbia, Mr. Marler will deliver at Toronto, Ottawa, Hamilton and Port William, Winnipeg, Regina, Calgary and Jasper Park. In British Columbia where he will spend most of his time before sailing on August 29, he will speak at Vernon, Nanaimo, Duncan, Port Alberni, Port Moody, Kootenay Landing, Kimberley, Windermere, Kelowna, Sicamous and Victoria.

Severe Penalties For Grain Mixing Violations Will Be Provided

Canada May Consider

Relations With Russia

Communications From British Government Have Been Received At Ottawa

Ottawa.—Certain communications of a "general and preliminary nature," regarding the signing of the optional clause, and also bearing on resumption of diplomatic relations with Russia, have been received by the government of Canada from the British government, that was the extent of the information given out here with respect to these matters which are accorded specific mention in the King's speech at the opening of the Parliament.

Just what position the Canadian government is taking on the question of resuming diplomatic relations with Russia has not been stated. It is considered likely, however, that Canada will support any such move.

Preparatory Work For

Western Air Mail

Tenders For Direction Lights Will Be Called For Soon

Ottawa.—Very soon now, we will be calling for tenders for the direction lights on the air mail route between Canada and J. A. V. head of the civil aviation branch of the department of national defence when discussing the preparatory work which is being done in this regard.

Now that the contract for the carriage of the mails has been awarded, the first work which must be done is to place the route in shape for flying. The locations for the direction lights will be fixed before they are delivered and the installation will proceed immediately.

To Cross Atlantic

In Small Vessel

Five Cleveland Men Believe They Can Make Return Trip Cleveland, Ohio.—The little power boat Karf, manned by five men who built it, put out from here on an adventurous attempt to cross the Atlantic ocean.

The Karf, captained by Joe Leppich, 31, a German, Great War veteran, took on 500 gallons of gasoline and enough canned goods and other supplies as to last three months. Captain Leppich intends to skipper her down the St. Lawrence river and then across the sea to Hamburg, Germany. "We will be in Hamburg in ten days. The Karf will make the trip there and back," said the captain.

Welcome For Airmen

Madrid.—The Spanish trans-Atlantic aviators, Major Ramon Franco and his three companions who were picked up at sea near the Azores after falling in a transatlantic flight were the object of a continuous ovation from the time they reached Madrid until their arrival at the station where governmental and civic authorities with a band met them.

Elimination Of Level Crossings Is Object Of New Undertaking

Ottawa.—The Board of Railway Commissioners, the road departments of the Provincial governments throughout Canada and the railways of Canada are making a joint survey of the level crossing situation with a view to a definite and comprehensive program of level crossing elimination.

The provincial officials are now engaged in classifying the crossings from the point of view of the degree of danger and the nature of the protection needed. When this has been done, the board, the provinces and the railways will confer and decide where the greatest urgencies lie. The most dangerous crossings will be eliminated first, and the first program to be drawn up will require from half a million to a million dollars a year from federal government, which means an expenditure of two to three millions annually. The grade crossing fund which has been replenished at the rate of \$200,000 a year for many years is proving insufficient along the campaign of the last few years inaugurated by the Hon. Charles Dunning, minister of railways. At present it is down to about \$120,000 and Mr. Dunning will probably next session to increase it to \$200,000 to the larger amount.

Under the provisions of the Federal government fund, which is administered by the Railway Board, will pay up to 40 per cent. of the cost of any crossing elimination and protection.

W. N. O. 1793

On Vacation Bent

A Little Advice To Those Who Would Secure The Utmost Benefits From A Holiday

Brunettes tan better than blondes. In fact, some blonde can't acquire a coat of tan at all—a real blue for many, since a tanned complexion has become so fashionable that drug stores now sell it in bottles.

According to a special "holiday bulletin" issued by the Canadian Social Hygiene Council, in cooperation with the Department of Public Health of Toronto, there are a number of "don'ts" and "do's" which the holidaying city or town-dweller should observe. If his constitution is to stand the strain of the summer rest-period.

Don't scratch mosquito bites, don't pick poison ivy, watch your milk and water supplies and get plenty of sun, but not too much at once, are some of the admonitions. And here is an emergency remedy for the case when one is advised to pack in the suitcase:

- 3 or 4 bandages, 2 or 3 inches wide,
- 1 pound of sterilized vasoline,
- 1 ounce of absorbent cotton,
- 1 or 2 ounces of tincture of iodine,
- 1 small roll of adhesive plaster about 1 inch wide,
- 1 ounce of boracic acid,
- 1 or 2 ounces of bicarbonate of soda,
- A hot water bottle,
- 2 ounces of aromatic spirits of ammonia.

"The last item is important in the event of a collapse," the bulletin adds. "From one-half to a teaspoonful of aromatic spirits of ammonia in a wineglass of water acts more promptly than whisky or brandy." It is one of the best stimulants we have. Cuts or scrapes should be washed with soap and water and carefully painted with tincture of iodine. Splinters should be removed with a needle sterilized by being held for a few minutes in boiling water and the injured place treated with iodine. Poison ivy irritation should be treated with the juice of the jewel weed, a plant growing two to four feet high, in marshy places, and possessing a juicy, semi-transparent stem, and with orange-colored flowers with brown spots. Either strong laundry soap, or fresh hot-water is a good substitute.

Avoid being overly zealous in your efforts to get sunburned. Half-an-hour at a time is quite as long as any part of the body not accustomed to exposure, should be subjected to the strong rays of the sun, for the first few days; then it will be quite safe to increase the time to an hour, and after a fairly good coat of tan has been developed you are well protected against the dangers of sunburn. If you do not take these precautions your holiday may be spoiled painfully.

Furthermore, recent revelations as regards the therapeutic value of the chemical rays of the sun have been such as to make one feel that it would be difficult to overestimate their importance. Therefore, we recommend for small children the sun suits which can be obtained in any of our stores. These suits only protect the hips and upper parts of the thighs and leave the balance of the body exposed to the sun's rays.

It is well to bear in mind that in order to get the therapeutic benefits it is not absolutely necessary that you be exposed to the direct rays of the sun; there is the sky, and reflected rays from the sky and clouds. On a clear day you may lie or sit on the shady side of the house, with the blue dome above you, and get from one-third to one-half of the benefits of the rays of the sun that you would get by exposing yourself directly to them.

For mosquitoes, three things should be remembered:—No sitting, no standing, and no oil.

The netting suits them out, the liquid ammonia, applied promptly to a bite, frequently neutralizes the poison and prevents obnoxious itching and the cool oil, put in very

"That wretched bug has been putting soap-bites in my trumpet again."—Dad Dierker, Bill, Frankfurt.

W. N. U. 1705.

small quantities on top of the water in rain-baths, little ponds, etc., prevents the mosquito larvae from developing into mosquitoes. Furthermore, certain aromatic preparations such as spirits of camphor, menthol, and oil of citronella, may be applied to exposed parts of the body to keep these pests away.

Insist that your food be protected from the filthy, disease-spreading house-fly.

And do not be on the go all the time during the holiday. Take some resting matter with you and spend part of the day, particularly in the middle of the day, in the shade of trees, in your hammock, or in an easy chair, or lying on a rug on the ground. Do not dance every night during your holiday and expect to come home rested and refreshed for the balance of the year.

A Root Disease Of Wheat

"Take-Air" Does Considerable Damage To Cereal Crops

The disease called "Take-Air" does considerable damage to cereal crops, particularly wheat. It also affects barley and rye, to a slight degree. When a wheat crop is severely attacked it is recommended to follow the next year with oats or some other crop not subject to serious infection, and to summer-fallow the field before again sowing wheat. If the disease is prevalent it is advised that wheat should be sown following winter rye grass or broom grass. In working out a rotation in areas where "take-air" is prevalent, it should be remembered that clover, corn, sunflower, and potatoes are not attacked by this disease.

Prairie Forest and Timber Limits

One Quarter Of The Forest Resources Of Canada Are In Prairie Provinces

So famous are the prairie provinces of Canada—Manitoba, Saskatchewan and Alberta—for the production of many millions of bushels of wheat, oats, barley, rye and other farm crops, that comparatively little is known of their other resources. Among the great assets of the prairie provinces are the national forests and timber limits, which contain approximately a quarter of the forest resources of the Dominion, and include one-third of Canada's pulpwood supplies. Saw-mill, cordwood, posts, poles, and so on are all represented. Eighty-seven timber mills are in operation, the total annual output being valued at over five million dollars. A recent development of the forest resources on lands owned by the Canadian Federal Government has been the establishment of a pulp and paper mill in Manitoba, employing 400 people on full time.

Heads Usually Win

Centre Of Gravity Of Coin Rather On Head Side

Why is it, asks a writer in *Answers*, that when a coin is tossed, say, at the start of a match, the little tendency of the man who has the coin to say "Heads?" Even those who always "make it heads" would be puzzled to say. But there is a scientific basis for the belief that a coin is more likely to come up heads than tails. An experiment carried out some years ago, in which four pennies, which were tossed a total of 2,500 times, showed that heads outnumbered tails. In tossing a penny 10 times, the results worked out, on an average, 51 heads to 49 tails. An interesting point, which probably has some effect on the result of a toss, is that the centre of gravity of a penny is rather on the head side than the tail.

Canada's Position

Canada's whole position is so closely bound up with that of the British Commonwealth, and these two are bound up with each other in particular, for her to link herself up with the Pan-American Union, where it is probable that her own special interests will clash with those of the British Commonwealth, to mention of America. Amusing a claim to a special nationality entails no breaking of historic ties any more than does that which follows the setting up of separate homes by members of one family.

The Herbaceous Border

A Charming Feature Of The Well-Kempt Home Grounds

The well arranged herbaceous border is a charming feature of the well-kept home grounds. If the plants have been well selected, there is assured a continuous flower display from early spring until the autumn frosts arrive. The perennial border may be started either by the purchase of plants in the fall or spring of the year, or by raising the plants from seed. The latter way is much more economical, and this is the reason of the year when the seeds should be planted for next year's border. In a new bulletin on "Herbaceous Perennials" by Miss Isabella Preston, of the Horticultural Division of the Dominion Experimental Farms, it is recommended to establish the seed bed in a shady position though not under trees. The soil need not be rich, but if it is very heavy it is recommended to lighten it with sand. For good germination the surface soil must be made very fine. Miss Preston recommends a width of four feet for the bed and a length limited only by the available garden space and the quality of plants desired to be grown. This bulletin, which contains a wealth of horticultural information for next year's garden, is available to all gardeners in many years' experience and observation, is now ready for distribution at the Publications Branch of the Department of Agriculture, Ottawa.

The perennials in all parts of Canada are enumerated and described and their culture carefully dealt with.

Arabian Hospitality

Queer Law By Which Murderer Can Escape Punishment

Among the Arabs, if a man who has murdered another flees to the dead man's father, and is given the friendly cup of coffee, his life may be spared. On one occasion, it is related that such an incident took place in Cairo. Friends of the family came in to relate the news to the bereaved father, and, recognizing the murderer committing a "corset," demanded vengeance. "No," said the parent of the dead youth: "he had drunk coffee here, and I must regard him as a guest."

Wanted a Treat

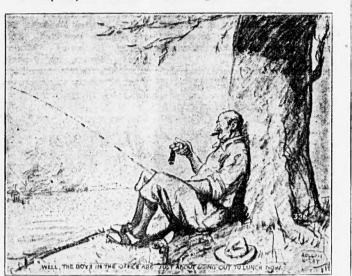

Mr. Chatterton: "The dentist is only going to take an impediment to my new plates. You won't have to go with me. I don't need your help."

Her Husband: "But, dearie, I do must to see you with your mouth full of plaster sitting in silence for ten minutes."

A Lot Of Lumber

The New York Times tells us that the lumber used last year in the plants of the Fisher Body Corporation, makers of bodies for all General Motors cars, would have filled a city of eight-room frame houses large enough to accommodate more than 250,000 people.

"I Am, Sir, A Brother of the Angle,"—Isaak Walton

Isaak Walton, famous cartoonist of the New York World and twice winner of the Pulitzer prize of \$500 for the best cartoon of the year—here was the winner for 1928 is not only a great cartoonist but an ardent fisherman as well, even rivaling Herbert Hoover, President of the United States, in his devotion to angling. "No man can love what he never does," said the cartoonist, and he is right. What Kirby tells the fisherman who says he caught the biggest one but it got away! Kirby has fished in many rivers and lakes of Canada, and he declares that no better fishing exists anywhere. His cartoon indicates that the fisherman is a happy, far from business care, and that he is sorry the boys in the office are not having such a good time.

He is famed in the nation of Nova Scotia, New Brunswick and Newfoundland and there are expert guides plenty to care for the angler and show him where the big ones are. The Laurentian Mountain region, not far from Montreal, has splendid trout fishing. Big "munkies," picker and other fish lure the angler to French River, Ontario, where there is an excellent bungalow camp, and the famous Sturgeon, on the north shore of Lake Superior, still holds the record for the biggest brook trout ever caught, the 14½ pounder landed by Dr. J. W. Cook, of Fort William, Ont. There are plenty of 6-pounders left which measure more than two feet in length, and a bungalow camp to make visitors comfortable. Every fisherman visiting the vicinity of Winnipeg should try this luck. The Devils Gap Camp—Kenora, on the Lake of the Woods, where there is fine sport in fishing, lake trout, muskellunge and whitefish.

In the vicinity of Banff, Alberta, famous resort in the Canadian Rockies, and out special Saltwater fishing, rainbow, trout, steelhead and Dolly Varden trout being popular favorites. Lake Minnewanka, near Banff, is famous for the big ones. Here, too, the boys in the office may try, too, go a-fishing and catch a plenty!

Describing the Horse

Information As Given Will Be Clear To Driver Of Motor Car

The horse is an automotive animal, consisting of a body mounted on four-brake legs. It has three speeds forward: namely, the walk, the trot, and the gallop. The intermediate gear is not so popular, the horse vibration. The horse may also go into reverse or stand still in neutral.

The engine of the horse is in the centre of the body and the driver sits on the hood. In the rear of the driver is room for a rumble seat, but this is not featured in the more recent models. The horse has a tail but no tail-light, thus distinguishing it from a motor car, which has a tail light but no tail. It is always well before starting out on your horse to see that he has been fueled and has sufficient water in his radiator. There is no need to worry about oil, as he supplies his own lubrication. The trouble, when it occurs, usually results from defects in the inner tubing. When the shoes are at fault, the cause is due to dropping nails, or from picking them out. The driver sits with his feet, respectively on the right and left running boards and clutches the steering gear firmly in his hands. To start the horse he exerts a firm pressure with his right heel against the body of the horse in the neighborhood of the differential. He then shifts gradually from low to intermediate and to high as the horse picks up speed. If that fails to start, the horse may stall, automatically shifting into gear. The driver must be on his guard against the possibility of the engine not being equipped with a windmill and the driver may find himself outspurred by the hoodless horse. Horses may be had in numerous styles to fit every purse and to serve widely varied purposes, with bodies of variable form in tone. And others is the racing horse, sometimes seen in a brilliant finish, not infrequently in a dull one. But perhaps the best feature of the horse is that one never thinks of parking him on less than an acre or two of land.—Baltimore Sun.

Men Who Succeed Are Those Who Have Initiative

Initiative is the managing of business enterprise, and when coupled with judgment becomes an invaluable feature of life. The world is divided into four classes: 1. The man of initiative, who does not want to be told. For him lies the reward of money and honors. 2. The man who does not want to be told only once. This man obtains honor only. 3. The man who does not want to be told several times. He is not worth his salt. 4. The man who does nothing till he is pointed, and even then fails. Such creatures deserve to be told that the world always carries them, unless they happen to be rich men's sons. Then they have "made easy" for them, but pity the father!

The Road To Popularity

People Who Travel It Must Observe Six Rules

Before you start along the road to popularity, you must have six things packed ready to take with you: 1. Unselfishness, a willingness to forget self in the interests of others. 2. Sincere friendliness towards people of all walks of life. 3. Ability or willingness to adapt oneself to be at ease under various circumstances and with all people. 4. An unassuming manner, not boasting about what one has or has, or can do, and avoiding stirring up needless envies and jealousies. 5. A controlled tongue, refraining from gossip and needless criticism, and speaks in kindness. 6. Truthfulness, so that others know you will keep confidences, and that your word is as good as your bond.

Farm Planning In Alberta

Town planning in Alberta is being extended to include farm planning. The farmer may get expert advice concerning the plans for his home and the layout of his farm.

Will Use Tyndall Stone

The Federal Government have decided on the use of Tyndall stone in the new Federal Government Building in Ottawa.

"Ever try a hot water bottle?" "Once! I filled it with water but it didn't heat up at all!"

Western Air Mail

Innovation In The West Praught With Great Possibilities

It is announced from Ottawa that with the availing of a contract for the Western Canada air mail, the business of preparing for the inauguration of an air mail service in this section of the Dominion has been put in hand and that every effort will be made to bring the route into operation at the earliest possible date.

This innovation in the West should have great possibilities, and not only just for the West, but for all Canada. It should lead to commercial intercourse between East and West and bring them closer together in a number of ways. It will mean a great saving of time in business mail, and this is important in the business world of today, in which dispatch figures large. It also illustrates the opportunities for freight and mail service that a few years ago were inaccessible. It seems destined to be one of the great means of transportation for freight and passengers across the Dominion, and it may be that a few years hence it will lead to the construction of the air mail in the shape of the Dominion, perhaps making the Atlantic and Pacific coasts little more than a day's journey apart. In a booklet issued by the University of Toronto, Canadians are urged to "turn their eyes to the skies, since the dependence of national development and progress on transportation is nowhere more marked than in Canada."

No country has a greater need for aviation than Canada and none with greater opportunities for its success. These are the words to explain its almost spectacular growth. Another factor in the adventurous wholesome which aviation offers to the youth of the land, Regina Leader.

Has Increased in Dignity

French Title "Marshall" Derived From Words Meaning Groom

The title of "marshall," which the French emperor has decided to abolish, has its origin in the word "mar" which is an excellent example of a word which has increased in dignity in the course of the centuries.

It derives from a couple of German words, "marah" and "scala," which may be translated horse-drawn, and the word "marah" is of time and especially in France, this type of servant acquired a new status regulating tournaments, etc., and presently becoming a kind of master of ceremonies, regulating the order of precedence at feasts and balls, under the title of "marshall." The word "marah" has been changed into a "marcehal" or "marshall," and the groom had been a commander-in-chief of armies.

Gives Credit To Canada

Dominion Grows Best Wheat Says New Zealand Farmer

Mr. James Lobb, who emigrated from England to New Zealand at an early age and became a very successful farmer, is celebrating his seventeenth birthday with a speech on the wheat of the world. He says that his globe-trotting has satisfied him that Canada can beat New Zealand in growing wheat, but not in the production of butter, wool and meat. Mr. Lobb is of the opinion that the inhabitants of Great Britain live, work and play under better conditions than the people of any other country in the world.

Howell: "That a pretty bad cold you have."

Howell: "I thought it was up to the usual standard."

As some fast ones see it, the only employment worth while is breaking records.

If you wish to please your friends get through talking so they can begin.

"Wouldn't you marry an idiot for the sake of his money?" "Oh, your proposal is no sudden!"—Lustige Köhler: Zeitung, Cologne.

Importance Of Tourist Trade As an Economic Factor In Canada Continues To Increase

The importance of the tourist trade as an economic factor in Canada continues to increase and is being recognized to a greater extent than ever by all classes of the community. Fresh interest has been stimulated in the subject by the recent publication of estimates by the Dominion Government placing the expenditures of tourists from other countries in this Dominion at \$250,501,000. It is predicted freely that when the totals for 1929 come to be written up they will be well in excess of the \$300,000,000 mark. The fact, moreover, that the expenditures of tourists from other countries in Canada amounted to \$250,501,000 in 1928, while those of Canadian tourists abroad amounted to \$102,215,000, thereby leaving a substantial credit balance of trade, is satisfactory, not when this worked down to a per capita basis it will be seen that Canadians spend far more in proportion abroad than do foreigners here.

For instance, the figures for the United States alone, these show that while American tourists spend some \$248,000,000, or about \$24.8 per capita here, Canadians spend \$75,000,000, or \$7.50 per capita, across the line. It is evident, therefore, that on a per capita basis it is not getting as large a share of the American tourist trade as we should. This will probably be corrected as the attractions of Canada become better known.

Commenting on the situation, the government statistician says that Canada's great natural assets, her picturesque scenery, the diversity of lake, forest, and river, the many large districts still remaining in their natural state, the beautiful and invigorating climate, the charm of the Canadian winter and its distinctive sports, the old world atmosphere of French Canada, attract tourists in ver-increasing numbers. The presence on our southern border of the United States, with its dense population possessing in a high degree the leisure and means to travel, the ease of communication between the two countries, the large automobile population, the relative cheapness of an automobile holiday in Canada for the average American family, and the close interlocking of business interests between the two countries result in a very large trade over the border. Canadians, too, are attracted by the larger United States cities with their theatres, museums, etc., and the more "settled" scenery while large numbers of well-to-do Canadians visit United States winter playgrounds in the south.

That Canadians realize the economic importance of this traffic is evidenced by the large sums spent on highway construction and advertising and by the good standard of service provided by hotels, tourist homes and camps. In addition to the direct value of the expenditure of tourists, there follows the wider diffusion of knowledge of Canada's resources and increasing investment in them.

At the same time it is evident that many Canadians do not realize the beauties of their own country. How many people in Ontario, for instance, realize the beauties of the lower St. Lawrence and the Maritime Provinces, where they can enjoy not only outstanding scenery but also the salt sea breezes from the Gulf of St. Lawrence or the Atlantic. At the same time the people who live in those regions know little or nothing of the delights of Muskoka or Timagami, or the Georgian Bay, while both are largely ignorant of the pleasure which may be had in the Rockies or at the Pacific Coast, or at the pretty resorts in the Prairie Provinces. A greater realization

of the pleasures that are to be had at home will not only help to keep Canadian money here but enable Canadians to place before citizens of other lands the joys of a stay of shorter or greater length in the pleasure grounds of the great Dominion. In other words, many Canadians do not know their own country well enough.—Montreal Times.

B.C. Needs Another Experimental Farm

Matter Was Brought Up In House By A. A. Fraser

The need for another experimental farm in the interior of British Columbia, south of the main line of the Grand Trunk Pacific, an area which produced for market every year 20,000 head of cattle from herds which numbered more than 100,000 head, was stressed by A. A. Fraser, C.M.P., in the House of Commons recently. British Columbia already had four experimental farms, said Mr. Fraser. It was not fair to give one province much more than another to assist an industry. He would, however, have conditions in British Columbia investigated later in the present year. There are twenty-three fully-dressed experimental farms scattered throughout Canada. They were located as follows: British Columbia, 4; Alberta, 2; Saskatchewan, 4; Manitoba, 2; Ontario, 2; Quebec, 5; Prince Edward Island, 1; Nova Scotia, 2; and New Brunswick, 1.

Winnipeg Newspaper Union

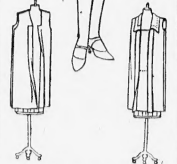

Adopted By All Provinces

The province of Alberta has adopted Old Age Pensions, the funds for which are provided by cooperation between the Federal and Provincial Governments. The scheme has now been adopted by all Canadian provinces from the Quebec boundary westward.

Canadians Taking To Air

In 1928 there were 6,000 passengers carried in Canada by air. In 1929 the number was 47,000. Over a quarter of a million miles of territory has been mapped by Canadian airman.

Kiln burned brick made by the Babylonians 6,000 years ago still exist.

LOOKING SLENDER

An unusual one-piece dress, cleverly designed to make its wearer appear more slender, with girdled front, fastened by cut apart to use perforated fabric, is shown in the illustration. A narrow belt attached at either side of front panel, holds in fullness through the waistline and ties in youthful bow at back. The girdled collar is smart, finishing the flattering square neckline. Style No. 224 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure, and if made of one material, only gives 36 yards of fabric. Plain silk and plain silk crepe, crepe satin, using the two-tone printed and plain linen, two tones in flat silk crepe or satin-finish crepe are unusually pleasing combinations. Price 25 cents in stamps or coin (cash preferred).

They've got to be straight to negotiate the tenth hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played Aug. 10-24, this summer. Immediately in front of the tee is a water-hole and then it's a case of from bunker to bunker.

The hole from No. 1 (championship tee is seen at the top and below is the hole in detail with yardages to tees underneath the panel).

Grades For Strawberries

Fruit Commissioner Has Worked Out Recommended Grades For Berries

The marketing of all kinds of produce is materially helped when properly graded. The fruit commissioner of the Department of Agriculture, at Ottawa, has worked out recommended grades for strawberries. First of all, it is recommended that the fruit be divided into No. 1, No. 2, and No. 3. No. 1 for jam. The specifications for No. 1 strawberries call for fruit with the calyx and a short stem attached, which is well formed, of good colour, firm, but not over-ripe, free from surface moisture, bruises, and pecks, mould, and from damage caused by insect, diseases or other means. The minimum diameter for this grade is three-quarters of an inch, measured from side to side.

No. 1 canning strawberries are recommended to consist of field run fruit, clean, sound, ripe, and of uniform size, of good colour and free from malformed or monkey-faced berries.

The specifications for No. 1 jam strawberries call for field run, clean, ripe, and of good colour, free from malformed or monkey-faced berries.

In order to allow for variations in degree of careful commercial grading and handling, an allowance of five per cent under the prescribed size and five per cent by volume may fall below the remaining requirements of the grade.

Farm Relief In Canada

Railroads Are Doing Their Share In Practical Way

Canadian railways have grain at rates that would bankrupt American roads. From Devil's Lake, N.D., to Duluth, a distance of 361 miles the rate is 19 1/2 cents. From Lyndell, Mo., to Fort William, a distance of 380 miles, the rate is 14 cents. The saving over 20 per cent. From Estuary, Sask., to Fort William the rate is 24 cents. The distance is 1,038 miles. From Bozeman, Mo., to Duluth, the rate is 42 cents. The distance is 1,033 miles. The Canadian farmer saves 10 per cent. Similar savings are in effect on the western railways.

Canadian farmers are giving their farm customers practical farm relief.

Adopted By All Provinces

The province of Alberta has adopted Old Age Pensions, the funds for which are provided by cooperation between the Federal and Provincial Governments. The scheme has now been adopted by all Canadian provinces from the Quebec boundary westward.

Inter-Imperial Trade Idea Meets With Heartiest Response Throughout British Empire

Potatoes Good Feed For Dairy Cattle

Value Nearly Equals Corn Silage Pounds For Pounds

According to A. E. Perkins, of the Ohio Agricultural Experiment station, potatoes have a feed value nearly equal pound for pound to corn silage. This is useful information as it gives the farmer a market for his culls and any others not finding a market.

The dry-matter content of potatoes is on the average 21 per cent, as compared to 28 per cent for silage. But as the dry matter of the potato is more digestible than that of the silage the total amount of digestible ingredients is the same. The dry matter of potatoes is mostly starch although it also contains about 1 per cent digestible protein.

The big cry against potatoes is that they give an off or potato flavor to the milk. But this is not due to the potatoes that the cow has eaten, but to the potato odor around the stable. Therefore if the cows are fed in a stall after milking and the potatoes are taken to see that there is no potato odor lingering around the barn during milking, the cream, milk and butter should not be tainted. No ordinary treatment such as pasteurization will remove potato flavor from the milk once it is absorbed.

Good potatoes are fed raw at the rate of 20 to 30 pounds daily in place of silage. Potatoes must be cut before in order to prevent choking. Care must be taken to see that no green potatoes or potato sprouts are fed as they contain a deadly poison called solanine.

Danger From Lightning

Nine-Tenths Of Casualties Said To Occur In Rural Districts

The United States Bureau of Standards, which has been making an investigation of the hazards of lightning, has found that 90 per cent of the casualties occur in rural districts. The board has drawn up the following code of safeguards:

(A)—Do not go out of doors or remain out during thunderstorms unless it is necessary. Stay inside of a building where it is dry, preferably away from fireplaces, stoves and other metal objects.

(B)—If there is any chance of shelter, choose in the following order: 1, Large metal or metal-frame buildings; 2, dwellings or other buildings which are protected against lightning; 3, large unprotected buildings; 4, small unprotected buildings.

(C)—If remaining out of doors is inevitable, keep away from: 1, Small sheds and shelter if in an exposed location; 2, isolated trees; 3, wire fences; 4, hill tops and wide open spaces.

(D)—Seek shelter in dense woods, a grove of trees, a cave, a depression in the ground, a deep valley or canyon.

A Heavy Loss

The star actress of the touring company rushed into the manager's room.

"My jewels," she sobbed. "They're lost . . . or perhaps stolen . . . I can't find them anywhere."

"Which jewels?" asked the manager, curiously.

"The ones I wear in the second act," the actress explained, brokenly.

"The diamond tiara, the emerald bracelet, and the diamond anklet."

"Well, Miss Smith," said the manager, severely, "I hold you responsible for those articles. My sorry, but I'll have to dock you seven-and-a-half per cent on Friday."

Making a Fisherman's Paradise

Maligne Lake, the largest glacier fed lake in the world, situated in Jasper National Park, Alberta, last year was stocked, as a government experiment, with fingerlings hatched from some 250,000 imported trout eggs. This year the fish are from five to six inches long, are thriving on insects and are quite at home in their new habitation. This spring 230,000 more fingerlings were added to last year's batch.

At three cents a mile a journey to the sun would cost \$2,790,000.

The Atlantic coast line of the U.S. is 5,560 miles long.

The blood absorbent about two pounds of oxygen daily.

The proposals of James A. Robb, Canadian Finance Minister, in connection with inter-imperial trade and the suggestion of an Imperial conference on Empire trade and tariffs has been discussed with the liveliest interest throughout the British Empire.

British newspapers are appealing to the government to respond heartily to the Canadian suggestions, but there has been no move yet. The Financial Times, in a long editorial, enthusiastically supports Mr. Robb's ideas.

"Meanwhile," continues the Times, "the present provides an excellent opportunity for co-operation in industrial development among the dominions themselves. With their magnificent and seemingly boundless resources and unutilized facilities for the generation of cheap electric power, Canada offers probably the most attractive field in the world today for British capital and enterprise."

The Times calls attention to Canada's development as a manufacturing country and appeals for the co-operation of British labor and capital to assist in this development.

Mr. Robb's proposals have called attention publicly to Canada's important part in the trade of the empire. In the present connection many Canadians now in London are deploring the lack of publicity which Canada receives. It is admitted that the benefits of travel in Canada and settlement there, but these visiting Canadian would like to see Canadian products advertised by the Dominion government in the same way that Australia, New Zealand and South Africa have been advertised throughout the country by the respective governments of those countries.

They see no reason why Canadian apples should not have the same publicity as Australian apples, which in the present connection confront the Englishman at every turn.

Facility For Languages

Leeds Railway Worker Has Mastered Twenty Since War

Mr. Harry Robinson, a Leeds railway worker, is master of twenty-two languages. He can speak English, French, Italian, Russian, German, Spanish, and Danish. He can read and understand, besides, Dutch, Persian, Esperanto, Swedish, Portuguese, Bulgarian, Chinese, Hindustani, Arabic, Turkish, Latin, Norwegian, Russian, Serbian, and Japanese. Previous to the war he knew only English and Latin, then he found a French north in a railway carriage, and mastered it with the aid of a dictionary. All his study has been done in his spare time since then.

Hard Luck Pursues Her

In Birmingham, England, according to "Time" the News Magazine, "Midge Gurney, governess-complained last week that her first dance, a war-time officer, was killed by a rifle grenade; her second, an aviator, fell to death three days before the wedding; her third, an engineer, was struck by a crane and died; her fourth died two days before the marriage."

Beat Him To It

The bus was crossing Westminster Bridge.

"Bus, conductor," said the American, "what do you call this stream here?"

"Happily the conductor looked over the side."

"Darn it!" he said. "The railroad men have sprung a leak again."

The Bore: "Anything I say goes?"

The Bored: "Well, say your name once or twice?"

"How are things with you?"

"Couldn't be better. My wife has eloped, my mother-in-law is dying, and I have just got 30 big letters."

—Laurie R. King.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Belby Alston, British ambassador to Brazil since 1925, died suddenly in a London hotel, aged 60 years.

Sheep from the famous flocks of His Majesty King George are being imported on Vancouver Island, and will be pastured in the Sooke Hills.

Two cargoes of Canadian grain have left Vancouver for Vladivostok. This is the first movement of this commodity to a western Siberian port in 1928. It is expected that a further cargo will go forward shortly.

London morning papers say the much-talked-of agreement between British and German film groups had been signed with involved capital amounting to approximately 60 million pounds sterling, or \$300,000,000.

Martin Poles, one of the most noted military test pilots in France, was killed instantly when his plane crashed because of a broken wing. His parachute failed him after the pilot had leaped from the plane.

A cordon of grease, which overturned and ignited in the main gallery of the Hamburg-American liner "Deutschland" furnished a stirring finish to an uneventful Atlantic crossing for 580 passengers.

Expanding trade in the New Westminster area is seen in the recent shipment of a large consignment of rope from the factory at New Westminster and cannot talk from the Fraser Valley to the British West Indies market.

A Chinese-British agreement has been signed providing for the training of Chinese naval cadets in Great Britain and to the furnishing to the Chinese government of a British naval mission in development of the Chinese army.

Bulman's Limited, of Vernon, B.C., has started construction of its new dehydrating plant and it is expected that the factory will be completed in time to handle the country's season's crop. Machinery is already moving in.

A shipment of purchased cattle consisting of 25 head of cattle, was purchased in Wisconsin and Illinois, by D. V. Runkle, of Regina, have been placed on the Pilot Butte stock farms near Regina. The shipment is valued at \$10,000.

Has Gained Popularity

Essay Contest Teaching Toledo School Children Facts About Canada.

A Canadian essay contest in the Toledo, Ohio, schools, sponsored by Edmond G. Odette, M.P., for East Essex, has gained such popularity in that city that one of the newspapers now is carrying a daily feature entitled "Facts About Canada."

"Canada," one of the Toledo papers pointed out, "is a nation of home-owners in the farming district, 78 per cent. of the people owning their own homes."

Other facts listed from day to day deal with Canada's natural resources, its hydro power, its fishing and its industrial enterprises.

The competition among the Toledo school children was started last fall when Mr. Odette, addressing the North Toledo improvement association, offered to pay the expenses of a trip to Ottawa for the author of the best essay on "Canada."

The proposal received such a favorable impression in Toledo that the chamber of commerce there offered to do likewise for a second student. The object of the essay contest and the trip, it is pointed out, is to promote a better understanding between the people of the adjoining countries.

All other eggs hatched and survived, in five generations their shells would make a pile twice the size of the earth.

THE FOUNDING FILM

Producers: "Jump!"
Actors: "But I see no mat!"
Producers: "Of course not. This is a founding film. We have to reproduce your film on the pavement!"
It 420, Florence.

A Pleading Incident

Deaf and Dumb Children Are Entitled To a Lecture

This pleading and pathetic little incident took place in Montreal recently at the largest health exhibit ever shown in Canada, when the Canadian Social Hygiene Council visited the Montreal Federation of French Health Agencies in a financial drive.

Morning, afternoon, and evening, health lectures were given, thousands of school children being carried free on the street cars. And one day they brought all the little deaf and dumb children in Montreal.

They gathered that silent company in the big lecture hall, and placed them in little groups of fifteen or 20, around lady teachers. Each teacher faced the lecturer, and the children solemnly looked at their teachers. And then the lecturer began to speak to the children while they stood, unhearing, and watched their teachers.

He spoke only a few sentences, and stopped. And all the teachers began to move their fingers, translating the lecture. The children's eyes followed eagerly as they understood the words that were being relayed to them, their own native language that they could not understand until it was translated into motion.

Children are notably fidgety at lectures, but not so these youngsters. To see how they enjoyed every minute of it was enough to bring tears to many eyes that watched them. They were being brought into closer touch with the world of their voiced playmates; their partial isolation was being temporarily broken down. To each of them, that lecture was a big event.

Recipes For This Week

(By Betty Barclay)

GOLDEN ORANGE FROSTING

Grated rind 1 orange.
3 tablespoons orange juice.
1 teaspoon lemon juice.
Yolk of 1 egg.

Confectioners' sugar.
Mix grated orange rind with fruit juices and let stand 15 minutes. Strain into beaten egg yolks and add enough sifted confectioners' sugar to spread.

HAMBURGER EN CASEROLE

2 lbs. of round steak ground

2 lbs. of lean hamburger.

2 large onions.

2 large peppers, green or red.

1 large onion.

1 8 oz. bottle tomato catsup.

1 lb. or more of bacon according to taste.

Butter your casserole dish or pan and lay about 1 1/2 inches of hamburger in bottom.

1 layer of one onion thinly sliced.

1 layer of one pepper thinly sliced.

Julies of half onion.

Salt and pepper to taste.

Repeat until the meat is used, making the second layer of meat about one inch thick, mix with enough hamburger left for about 1 1/2 inch thick on very top. Pour a whole bottle (8 oz.) of catsup over and strips of bacon. Bake slowly or in modern oven for one hour and a quarter.

Early oil wells at Baku were scooped out by hand.

COL. CHAS. LINDBERGH AND HIS BRIDE

Photograph shows Colonel Charles Lindbergh and his bride, formerly Miss Anne Morrow, daughter of D. W. Morrow, United States ambassador to Mexico, at Mitchell Field, L.I., where they witnessed the test flight in the Daniel Gutzwiller safe-aircraft competition. This is their first appearance since their marriage on May 27, Col. Lindbergh is a trustee and consultant of the Daniel Gutzwiller Fund for the promotion of aeronautics.—Copyright, 1928, Pacific and Atlantic Photos, Inc.

Out Of Their Element

Eskimo Boys Cannot Stand Climate Of Eastern Canada

Ben Ell, nine-year-old son of Chief John Ell, head of the Southampton Island Eskimos, and Sam Pudlat, who have been endeavoring to learn the ways of civilization at Lakefield preparatory school, near Peterboro, Ont., have been forced to give up their studies there and hurry home on account of illness.

Ben and Sam soon became favorites at the Lakefield school where they have been for two years, but just before Christmas both were forced to relinquish their studies to face an ordeal of sickness. Influenza, pneumonia, measles, tonsillitis and adenoids proved too grueling a test for little Eskimo constitutions and it has been decided to send them back to their northern home.

Evidently Not

In a small country town they were discussing the question of a brighter Sunday.

Various proposals were put forward, and some daring soul suggested a Pleasant Sunday Afternoon. A dignified old lady rose in the meeting and said: "There will be no Pleasant Sunday afternoon where I am."

Rush For Homebuds

Homebuds are being filed on at the rate of 100 a week in the Edmonton Land Office.

PREMIER FERGUSON CHRISTENS AEROPLANE

Premier Ferguson, of Ontario, christening the "Imperial," a Gypsy Moth plane, presented to the Aviation League of Canada by Imperial Oil Limited, at the opening of the Hamilton Airport recently. The plane is being used by Major-Gen. J. H. MacBrien, C.B., C.M.S., D.S.O., in his travels about the country in the interests of aviation.

Ontario Pension Act

Qualifications Necessary For Those Who Wish To Take Advantage Of Old Age Fund

Persons who have reached the age of 70 years, being British subjects resident in Canada 20 years, and in Ontario five years, and who are not in receipt of income to the amount of \$360 a year, may apply for pensions under the Ontario Old Age Pensions Act as defined by order-in-council and published in the Ontario Gazette.

To receive the pension applicants must not be Indians as defined by the Indian Act. Any voluntary assignment or transfer of property made for the purpose of obtaining the pension will disqualify the applicant under the act.

A son or daughter with sufficient means is bound to provide for maintenance of a dependent parent, the Pensions Act not relieving them from this obligation.

Employment At Highest Peak

Indications Of Great Activity In Business Throughout Dominion

What is regarded as a reliable indicator of the good condition of business generally in Canada is the official report on employment throughout the Dominion. On June 1st of this year, employment was at the highest level of any month on record, showing 1,046,750 persons employed by 6,752 firms, an increase of 53,503 persons in employment compared with May 1, 1928. This increase of 53,503 or 5.4 per cent. brought the index number to 122.4 or over three points above the record level in the last nine years, recorded in August 1, 1928. Increased employment has been due to the great activity in all lines of manufacturing, construction, lumbering and other industries.

Heating By Radio

Centralized Stoves No More Important Than Sending Mail Around World

While some, perhaps many, of the wonderers prophesied for days to come may be far-fetched and based on a glib public, all the amazing tidings of the modern age were once a similar case. Had anyone foretold the coming of radio not so long ago, ridicule would have been his portion. So the telephone was a miracle in its day, and the typewriter had to fight its way into universal use. Who could have foreseen the place the automobile was destined to occupy from its first examples or, induced people to believe that service could be harnessed for the white of mankind. Now we are told that radio will bring light and power to our homes and industries and provide heat as well. Centralized stoves instead of central heating plants are no more impossible than sending mail round the world without visible agents.

Just one stove for the entire city and that raised 1,000 feet in the air, is the possibility announced by Paris, France. The scheme entails the establishment of wireless energy to be sent from the top of the Eiffel Tower. In each house there would be set up a machine, like, yet unlike a radio, that would intercept the waves, transform them into heat and be used as a radiator to warm the room. The proposed waves would be of 400 to 500 volts in waves of two to three meters' length. All that is needed is to place on the receiving posts a filament that the wireless flow will raise to incandescence, and you will have your stove unit. Given enough such filament units and you have your heating or cooking stove minus coal, oil, gas or wired electricity.

Sale Of School Lands

Great Interest Shown In This Year's Auction Sales Held In West

Unprecedented interest was manifested in this year's auction sales of reserve school lands in Saskatchewan and Alberta. Attendance at the auction sales were high, and reached 1,000 at some points. Many farmers acquired additional land adjoining their present holdings for the purpose of extending their operations, or to make provision for their sons. Many of the buyers of those lands were "new Canadians" who have prospered in western Canada.

In all, some 758,000 acres of land were sold for a total of \$10,192,829. Prices paid ranged all the way from \$8 to \$70 an acre. In Saskatchewan, 4,862 parcels were sold, the average price being \$12.81 per acre, and in Alberta 63 parcels, the average price being \$15.55 per acre. Two of the heaviest sales were at Antelope, Sask., where \$1,400,000.00 was realized, and at Rosemont, Sask., where \$1,216,000.00 was taken.

Grandmother Says

"That when she was a wee, tiny baby and her mamma did not have enough milk to nurse her, she gave her Eagle Brand Milk, which made her strong and healthy—and now my mamma is giving me Eagle Brand, and I have gained over half a pound a week since I was three months old."

The high quality, uniformity and economy of Eagle Brand make it the first choice for cooking and table use.

If your baby is not gaining in weight as it should—if it cries or is fretful or restless—something must be the matter with it.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 110 St. Paul St. West, Montreal, and they will send you, free of charge, a very helpful baby welfare book containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

Miss Brown, of the local nursing staff, left this morning, on her holidays.

Mrs. Kirner and Miss Marjorie Lamb, were visitors to town, a few days this week.

A prairie fire on a lease south of the Saskatchewan river destroyed a quantity of pasturage, Sunday.

Give the other fellow a chance to cool off, don't greet him with a reminder how hot the day is.

A report is out that the next payment of the Wheat Pool will be 21 cents.

Mr. and Mrs. W. R. Brodie, and Gordon and Beatrice, left on Sunday, by car, for Eton, Sask., to visit with relatives.

Good progress is being made with the Wheat Pool elevator, and the carpenter work is about over.

Miss Lorna Glover, and a friend, from Calgary, were visitors at the home of Mrs. A. K. McNeill, this past week, arriving here by car, and leaving later for Regina.

Miss M. Flock, of the local nursing staff, returned from her holiday vacation, on Friday.

All alone—until the Serpent caught her! See Adam and Eve in "The Garden of Eden" for an evening of fun! It's Corinne Griffith's funniest, finest, eye-bling film!

R. L. Arthur is nursing an injured foot, sustained when a chain slipped on a boulder being removed from the field, the stone rolling back on to his foot. It was necessary to have the injured limb placed in a plaster cast.

Taking into account the extreme heat and lack of precipitation there is much cause for congratulation that the crop has weathered through as well as it has on the summer fallow land and even it, some cases a fair crop on stubble land is to be seen.

Allan Bouton, a new home-lander in the Atkins district, Saskatchewan, while sitting in his shack last week, was struck by lightning which came down the stove pipe chimney. The bolt tore the shoe completely off his right foot. He says it felt "pretty hot."

A softball game between the Bachelor's Club and a pickup town team was played Wednesday evening. There was a good crowd of spectators present. The town team took the big end of the score.

A dance will be held in the theatre after the show on Saturday night, this week. Admission, 50c. Good music. Orchestra will play for show.

Vic. Niwa, returned from a trip to Broderick, Sask., on Wednesday night.

Ed. Kneppik, left this week for Broderick, Sask., and will help his grandparents there with the harvest.

A number of farmers were in town on Wednesday night for their Wheat Pool cheques.

Mrs. R. Beatty and son, Robert, who have been the guests of the former's sister, Mrs. J. N. Anderson, left on Sunday accompanied by Mrs. Anderson and children for their home at Clarendon, Alta. Mr. Beatty motoring over to here on Saturday.

Winter Shelter For Fall Pigs

As the result of experiments it has been found that there is little difference between inside and outside shelters for fall pigs. Expensive buildings are not absolutely necessary therefore uneconomical. Ordinary cabins well covered over with straw, or a straw pile will be found quite satisfactory. To obtain best results with fall pigs the sows should have access to pasture, probably, late sown oats. Rape and fall rye sown towards the latter end of June make excellent pasture for young pigs at weaning time. August and September are the best months to have fall pigs farrowed, therefore, it is important in the production of two litters per year to plan matings accordingly. To insure best results the spring litters should be farrowed in March or early April to permit the breeding of sows for early fall farrowing.

During the fall and winter of 1928-29, twenty-one pigs were divided equally into three lots. Seven were retained in a comfortable pigery; seven were wintered in straw covered cabins outside, and the remaining seven were placed in a run with a straw pile for shelter. These pigs were fed the same ration.

Found

During the first week of June, a lady's handbag containing a small sum of money and other articles. Owner can have same by applying at The Le Page Store, Limited, Medicine Hat, Alberta; where the article was left.

Domestic Animals Act, Strays

On the premises of Herbert Brooks, West Half of Section 16, Township 21, Range 1 West of the 4th Meridian. One bay Colt, white strip in face, left hind white stocking, right hind foot all white, no brand, about two years old.

throughout the one hundred and eighteen days on trial. At the conclusion of the trial the lot housed in the pigery had made an average gain of 110 pounds per day. The lot in the straw-covered cabins made an average gain of 90 pounds per day, and the lot allowed to run at the straw pile showed an average gain of 105 pounds per day.

It is obvious from the results at Indian Head, which cover a period of years, that fall litters (August and September) can be housed and fed quite economically in outside shelters. The main consideration is to keep sleeping quarters clean, dry, well bedded and free from unnecessary draughts.

The Gateway of C. P. R. Connections to New York

At the heart of New York, at 42nd Street is the New York Central Station where Canadian Pacific trains from Montreal and Toronto arrive and depart. The above is a photo of the New York Central station which is a part of the station building and is one of the outstanding buildings in a city of wonderful buildings. Standing almost forty stories high at the head of Park Avenue, it rises well above the high buildings surrounding it. It is of gold relieved by brilliant reds and greens and when lit by a battery of floodlights at night it is one of the beauties of New York and can be seen for many miles around.
